310 Conservation Way,
Ellabell, GA 31308

Dear Hiring Committee at Hyundai Motor Group,

I am very excited to apply for the IT Department Robotic Software Automation Specialist. As a student at the University of Georgia majoring in Computer Science and a minor in Spanish, I am eager to support Hyundai's mission of innovation in IT infrastructure. With the experience I've already acquired, I believe I would be a great addition to the team.

At American Family Insurance, I developed a bilingual web platform that automated 70% of client onboarding and reduced account creation time by 40%, directly improving operational efficiency. I also designed a POS system concept for a Korean small business aimed at optimizing transaction flow and inventory management. This project especially challenged me to think critically about real-world technical needs and business goals, which taught me skills that are used in a professional setting.

Beyond technology, I greatly value communication and global collaboration. I am fluent in Spanish and have beginner knowledge of Korean, which I am continuing to study out of both personal interest and a desire to work effectively in diverse, international environments like Hyundai's.

All projects and skills mentioned above have shaped me as a person and taught me what it takes to contribute meaningfully to a team. My most valued attributes are being detail-oriented and having a strong work ethic. I'm eager to learn whatever is needed to go above and beyond in this role and to connect with my team members along the way.

I truly hope to contribute all these skills to Hyundai's IT Department. What all my past projects have had in common is a focus on solving real problems in my community. That drive, to build tech that helps people, is my true passion, and it's exactly why I'm so excited about Hyundai. Seeing how quickly the electric vehicle industry has grown and the impact it's already making, I knew I wanted to be part of that movement.

Thank you for considering my application. I'd be excited to contribute my skills, creativity, and growth mindset to Hyundai's IT innovation team.

Sincerely,
Michael Macheers
